Internship Focus: Highway Construction

Internship Opportunity: Summer Intern - paid

Internship Location: NJ

Internship Description: George Harms Construction Co., Inc. is a New Jersey based general contractor for all phases of construction including but not limited to highway construction, bridges, roads, train stations and building construction. The company's operations include some of the most sophisticated and technically advanced projects ever constructed in New Jersey. These projects are completed utilizing the firms advanced equipment fleet and highly trained work force. The summer internship program is an extension of this and is designed to allow individuals to explore and understand the major components are our Construction operations. This includes project procurement, project management and field operations. Under the tutelage of experienced staff, interns are provided opportunities to learn and grow their skills and understanding of the Construction Industry.
